DICHTUNGSTECHNIK

## Profiles for edge protection

**Rubber technology: We know how!**

### Relevant markets and industries:

- vehicle manufacturing
- caravan
- equipment manufacturing
- container and plant construction
- technical trade
- electric constructions
- machinery manufacturing for special purposes

**A broad variety of products!**

# What we offer:

## Made of PVC

- profiles are variable in colour and structure
- very high clamping force due to a metal carrier
- also available as a sealing profile
- large amounts in stock
- minimum order quantity: 1 bundle

## Made of silicon

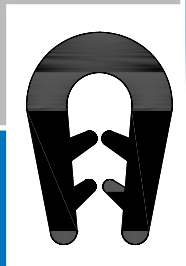

- high temperature resistance
- very good performance against UV radiation and ozon
- good performance against fire
- variable in colour
- option: with stainless steel carrier
- FDA CFR title 21, part 177.2600, BfR XV „silicone“

## Made of rubber/EPDM

- good performance against UV radiation and ozon
- available for fire prevention purposes (EN45545)
- available with a steel or wire carrier

## Made of TPE

- variable in hardness from 30-85 Shore A
- variable in colour
- good mechanical features
- available for special qualities

## Our strength: we offer the all-inclusive package!

- longtime experience and know-how in extrusion
- consulting: individual solutions including the tools and production services
- Assembly and packaging for customer specifications
- storage and modern logistics – short delivery time lines
